Racing 1-Seat Rear End Conversion Kit

This Cult-Werk rear 1-seater conversion is an ABS plastic part and is CNC milled on modern 5-axis machining centers! The rear fender „Racing“ was optically very complex and the rear is characterized by an easy mounting procedure. All you have to do is remove the original rear section and replace it with our metal inner fender. Then the lighting in the rear fender needs to be wired and finally the ABS plastic part is screwed to the metal inner fender! The rear can be used for tires up to 280 mm and the narrow construction results in a very beefy look.

- Includes fender base, fender cover, leather seat and mounting hardware

Description: Solo version , Certification: With Approval , Unit: Kit , Qty.: 1
